Concrete paving (dibor, in Turkish) Let's talk about the pavement construction Concrete is a kind of a very common and stable materials, which is utilized in many types of constructions, such as buildings, bridges, highways, etc. Paving is the most popular kind of constructions which are made with concrete. Concrete paving construction is first used in the early 20th century. It's the creation of concrete pavements which is a kind of very very popular as well as most common construction nowadays. One of the most popular and most preferred kind of concrete pavement is the Concrete Paving (Dibor). Concrete Paving is a kind of the construction, which is formed by using concrete as a base material. In general, a concrete paving is made of concrete blocks, but in some cases, they are made by using the concrete monolithic (solid). So, there are many types of concrete paving, such as conventional concrete, precast concrete, concrete paving blocks, precast blocks, etc. Concrete paving blocks are also created by the layers of concrete, which is very famous, because of its strength and durability. Concrete Paving has very good thermal
